

## ITN201

### Intelligent Service Access Aggregation Platform

ITN201, with redundant AC or DC power supply, provides 4\*1GE uplinks +12\*GE downlinks, or 2\*10GE uplinks + 12\*GE downlinks, and 2 sub slot which can insert Ethernet service card (include 2\*10GE card), E1/T1 emulation card and PTP card. As part of the iTN solution deployed on the edge of carrier networks, it provides a very competitive solution with high port density which reduces the cost per line, plus scalable network ability and a smart way to reduce OPEX with its rich OAM & troubleshooting functions.

ITN201 also could be deployed 10G CPE NID.
